K12 Electro-Hydraulic Rising Beam

Boon Edam Tomsted's electro-hydraulic Patriot rising beam barriers offer the highest level of protection for your access points. The Patriot K12 crash test certified rising beam deters both vehicle and pedestrian traffic. Minimal excavation is required across the roadway.

The Intertex Patriot rising beam has a full guard height of 36". Installed in-ground, the unit requires a maximum excavation of 48" on the outside areas of the roadway, avoiding excavation where most underground utilities and obstructions reside.

The Patriot beam allows paved stones on the roadway directly adjacent to the barrier end is flush to the roadway when open. The unit may be installed in close proximity to a non-related ornamental slide gate.

*K12 U.S. Department of State Certified: Stops 15,000 lb. vehicle
at 50 mph with maximum penetration of 3 ft.*
